

Stockholm 2022-02-07

Dear Valued Customer,

This is to inform you about the Mastermix with Taq Polymerase; product numbers 101.803-01, 101.804-01 and 101.805-01, now available as Accessory Product to the Olerup SSP product line.

The change does not involve any change to the composition of the product. The product is identical to the Mastermix with Taq Polymerase that was previously included in Olerup SSP kits.

Accordingly, there is no indication that the Mastermix purchased under the product numbers listed above should have any negative impact on the performance of SSP kits purchased with Mastermix without Taq polymerase.

The Mastermix with Taq Polymerase is CE certified as a General IVD.

A handwritten signature in blue ink that reads "Maria Ilar".
