AlloSeq Tx

Product name:	AlloSeq Tx 17
Product code:	ASTX17.1(96)-A-RUO
Lot number:	23-1607
Expiry date:	2024-12-13
Number of tests:	96
Storage:	

	Box 1, 3 and 4:	-15°C to -25°C
	Box 2:	Room temperature
	Box 5:	2°C to 8°C
	Product Insert: Room temperature	

Kit contents: This product contains DNA sequencing tests designed to detect variants of the tissue typing genes for research use only.

Warnings and Precautions

It is strongly recommended that these kits are validated by the user prior to implementation in the laboratory using samples whose genotype has been determined by other molecular based procedures.

It is strongly recommended that the user follows all instructions provided via product labelling. Deviations from the described procedure are not recommended, may not be supported and could lead to typing errors. It is recommended that a positive control (human DNA) and negative/no template control (using sterile water in place of DNA) be included on every library preparation run. The positive control must produce a quantifiable library and the resultant sequence must be concordant with the sample's expected genotype. There must be no quantifiable library (measured by QuBit) in the negative template control for each experiment. If a quantifiable library is produced for the no template control the run must be repeated.

Changes compared to the previous IFU:

IFU083 updated: Sections 1.1, 1.4, 1.6, 1.7, 1.9 and 1.10 were edited for clarity. Section 1.3 were modified to reflect verification studies performed by CareDx. Section 6 was modified to include thermal cycler parameters requirements for compatibility with Tx assay.

CareDx Pty Ltd

CERTIFICATE OF ANALYSIS

CERTIFICATE NUMBER: 24-0001

MANUFACTURER AND TESTING LABORATORY:

CareDx Pty Ltd
20 Collie Street
Fremantle WA 6160
AUSTRALIA

PRODUCT INFORMATION

Product Name:	AlloSeq Tx 17	Kit size:	96	
Batch number:	23-1607	Expiry date:	2024-12-13	

TESTING PROCEDURE

A panel of DNA samples (whose genotype was known) was used to assess the library preparation, enrichment and sequencing performance on a single kit from this batch against defined acceptance criteria

TEST RESULTS

TEST	ACCEPTANCE CRITERIA	RESULT
Pre Hybridisation		
Yield	≥ 41.36 ng/uL	PASS
Fragment Size	≥703 bp	PASS
Enrichment		
Enrichment Yield	≥ 3 ng/uL	PASS
Fragment Size	≥ 675 bp	PASS
Sequencing Analysis		
Genotype	Correct genotypes obtained for all	PASS
Q30	≥ 95% of loci tested with ≥ 87% reads with quality score of Q30 or higher	PASS
Allele balance	≥ 95% of loci tested with ≥ 38% average	PASS
Coverage	≥ 95% of loci tested with ≥ 150x average	PASS

CONCLUSION

Compliance with acceptance criteria?	**YES**	~~NO~~

CERTIFICATION

I hereby certify that the testing was performed according to the company's standard operating procedures. I also certify that the results obtained were reviewed and released by myself prior to the issue of this certificate.
