The specificity of each primer solution of the kit has been tested against 48 well characterized IHWC cell line DNAs.

No DNAs carrying the alleles to be amplified by primer solutions 6, 8 to 11, 13 and 14 were available. The specificities of the primers in primer solutions 6, 8, 11 and 13 were tested by separately adding one additional 5'-primer, respectively one additional 3'-primer. In primer solutions 9 and 14 it was only possible to test the 5'-primer, the 3'-primer was not possible to test. In primer solution 10 it was only possible to test the 3'-primer, the 5'-primer was not possible to test. An additional 3'-primer in primer solution 7 was tested by separately adding one 5'-primer.

Results: No false positive or false negative amplifications were obtained.
