Olerup SSP® HLA-Cw*18

Product number: 101.629-06 – including *Taq* polymerase

Lot number: 40G

Expiry date: 2011-October-01

Number of tests: 6 Number of wells per test: 5

Storage - pre-aliquoted primers: dark at -20°C

PCR Master Mix: -20°C
 Adhesive PCR seals
 Product Insert
 RT

This Product Description is only valid for Lot No. 40G.

CHANGES COMPARED TO THE PREVIOUS *OLERUP* SSP® HLA-Cw*18 Lot

The HLA-Cw*18 specificity and interpretation tables have been updated for the HLA-Cw alleles described since the previous *Olerup* SSP® HLA-Cw*18 lot was made (Lot No. 70E).

The HLA-Cw*18 primer set is unchanged compared to the previous lot.

101.629-06 – including *Taq* polymerase

Lot No.:40G Lot-specific information www.olerup.com

PRODUCT DESCRIPTION

HLA-Cw*18 SSP typing

CONTENT

The primer set contains 5'- and 3'-primers for identifying the Cw*1801 to Cw*1803

PLATE LAYOUT

Each HLA-Cw*18 test consists of 5 PCR reactions in an 8 well cut PCR plate. Wells 6 to 8 are empty.

1	2	3	4	5	empty	empty	empty
		J	-	J	cilipty	Cilipty	cilipty

The 8 well PCR plate is marked with 'C18' in silver/gray ink.

Well No. 1 is marked with the Lot No. '40G'.

A faint row of numbers is seen between wells 1 and 2 or wells 7 and 8 of the PCR trays. These stem from the manufacture of the trays, and should be disregarded.

The PCR plates are heat-sealed with a PCR-compatible foil.

Please note: When removing each 8 well PCR plate, make sure that the remaining plates stay sealed. Use a scalpel or a similar instrument to carefully cut the foil between the plates.

INTERPRETATION

October 2009

Rev. No.: 00

The interpretation of HLA-Cw*18 SSP subtypings will be influenced by the Cw*0222, the Cw*04, the Cw*0508, two Cw*06, the Cw*07 and two Cw*08 alleles, when present on the other haplotype. In addition, the B*9537 allele will be amplified by primer mix 5.

UNIQUELY IDENTIFIED ALLELES

All the HLA-Cw*18 alleles, i.e. Cw*1801 to Cw*1803, recognized by the HLA Nomenclature Committee in October 2009¹ will be amplified by the primers in the HLA-Cw*18 SSP kit.

¹HLA-Cw alleles listed on the IMGT/HLA web page 2009-October-19, release 2.27.0, www.ebi.ac.uk/imgt/hla.

RESOLUTION IN HOMO- AND HETEROZYGOTES

The three HLA-Cw*18 alleles can be combined in 6 homozygous and heterozygous combinations. Three of these genotypes do not give rise to unique amplification patterns.

$$+++++$$
 $1801,1803 = 1802,1803 = 1803,1803$

SPECIFICITY TABLE

HLA-Cw*18 SSP subtyping

Specificities and sizes of the PCR products of the 5 primer mixes used for HLA-Cw*18 SSP subtyping

Primer Mix	Size of spec. PCR product ¹	Size of control band ²	Amplified HLA- Cw*18 alleles	Other amplified HLA Class I alleles ³
1	425 bp	800 bp	*1801-1803	*0617, 0707, 0709, 0749, 0776
2	560 bp	1070 bp	*1801, 1803 [?]	*070101-0733N, 0735-0791
3	225 bp	1070 bp	*1802, 1803 [?]	*04010101- 040112, 0403- 0420, 0423-0448
4	535 bp	1070 bp	*1801-1803	
5	165 bp	1070 bp	*1803	*0222, *0508, *0609, *0827, *0829, B*9537

¹Alleles are assigned by the presence of specific PCR product(s). However, the sizes of the specific PCR products may be helpful in the interpretation of HLA-Cw*18 SSP typings.

When the primers in a primer mix can give rise to specific PCR products of more than one length this is indicated if the size difference is 20 base pairs or more. Size differences shorter than 20 base pairs are not given. For high resolution SSP kits the respective lengths of the specific PCR product(s) of the alleles amplified by these primer mixes are given.

Nonspecific amplifications, i.e. a ladder or a smear of bands, may sometimes be seen. GC-rich primers have a higher tendency of giving rise to nonspecific amplifications than other primers.

PCR fragments longer than the control bands may sometimes be observed. Such bands should be disregarded and do not influence the interpretation of the SSP typings.

PCR fragments migrating faster than the control bands, but slower than a 400 bp fragment may be seen in some gel read-outs. Such bands can be disregarded and do not influence the interpretation of the SSP typings.

Some primers may give rise to primer oligomer artifacts. Sometimes this phenomenon is an inherit feature of the primer pair(s) of a primer mix. More often it is due to other factors such as too low amount of DNA in the PCR reactions, taking too long time in setting up the PCR reactions, working at elevated room temperature or using thermal cyclers that are not pre-heated.

²The internal positive control primer pairs amplify segments of the human growth hormone gene. The two different control primer pairs give rise to either an internal positive control band of 1070 base pairs, for most wells, or a band of 800 base pairs, for some wells.

Well number 1 contains the primer pair giving rise to the shorter, 800 bp, internal positive control band in order to help in the correct orientation of the HLA-Cw*18 SSP subtyping.

In the presence of a specific amplification the intensity of the control band often decreases.

³Due to the sharing of sequence motifs between HLA-Cw alleles some non-HLA-Cw*18 alleles will be amplified by primer mixes 1, 2, 3 and 5. In addition, the B*9537 allele will by amplified by primer mix 5.

"?", nucleotide sequence information not available for the primer matching sequence.

CERTIFICATE OF ANALYSIS

Olerup SSP® HLA-Cw*18 SSP

Product number: 101.629-06 – including *Taq* polymerase

Lot number: 40G

Expiry date: 2011-October-01

Number of tests: 6 Number of wells per test: 5

Well specifications:

HLA-Cw*18

Well No.	Production No.
1	2009-647-01
2	2009-647-02
3	2009-647-03
4	2009-647-04
5	2009-647-05

The specificity of each primer solution of the HLA-Cw*18 primer set has been tested against 48 well characterized IHWC cell line DNAs.

No DNAs carrying the alleles to be amplified by primer solution 5 were available. The specificities of the primers in primer solution 5 were tested by separately adding one additional 5'-primer, respectively one additional 3'-primer.

Results: No false positive or false negative amplifications were obtained.

Date of approval: 2009-October-23

Approved by:

Quality Control, Supervisor
